STAGING and BENCHING

Polydome Polytunnel Shelves

Weldmesh shelves which attach to the frame of the polytunnel. These shelves are only designed to fit our polytunnels (2m hoop spacings). The basic unit is 0.75m wide and 1.8m long (2½ft x 6ft). Extensions of 1.8m (6ft) can be added to the basic unit to make the shelf longer. (Please let us know the overall dimensions of your polytunnel so we can give you the correct fittings.)

Basic Shelf for **2.5, 3.5 & 4.5m wide tunnels**
(0.75m x 1.8m): €196

Extension of 1.8m in length: €174

Basic Shelf for **5.5 & 6m wide tunnels**
(0.75m x 1.8m): €199

Extension of 1.8m in length: €176

Very strong aluminium benching with either fibre cement or weldmesh top

	Fibre Cement	Weldmesh
0.6m wide x 3m long x 0.8m high (2' x 10')	€340	€460
0.6m wide x 3.6m long x 0.8m high (2' x 12')	€417	€591
0.8m wide x 3m long x 0.8m high (2.5' x 10')	€381	€508
1m wide x 3m long x 0.8m high (3.3' x 10')	€432	€555

COVER PROTECTION TAPE

Anti hot spot tape (3cm x 9m): €5

Anti hot spot tape (5cm x 9m): €8

Anti hot spot tapes protect polythene from wear as a result of rubbing off the polytunnel frame. It needs a clean, dry surface to adhere properly. We recommend cleaning the surface of the steel with white spirits to remove any grease but ensure all trace of the solvent has evaporated before applying.

COVER REPAIR TAPE

Small roll (96mm x 10m): €25

Small roll (96mm x 30m): €50

This is a new type of tape with excellent adhesion.

(We recommend using isopropanol to clean your polythene before applying repair tape)

PVC DOOR FLAPS

0.75m wide PVC Door Flap (not inc. €5 steel tube):	€71
1.5m wide PVC Door Flap (not inc. €7 steel tube):	€83
2m wide PVC Door Flap (not inc. €10 steel tube):	€92

REPLACEMENT POLYTUNNEL COVERS

900 Gauge Clear Polythene 6 year UV guarantee		720 Gauge Clear Polythene 4 year UV guarantee	
Per Linear Metre		Per Linear Metre	
2.5m wide:	€5.25	10m wide:	€15.00
3.5m wide:	€7.34	800 Gauge Clear Polythene 5 year UV guarantee	
4.5m wide:	€9.46		
6.5m wide:	€13.65	12.5m wide:	€19.19
8m wide:	€16.80	13.5m wide:	€20.91
9.2m wide:	€19.32	15.5m wide:	€24.11
10m wide:	€21.00		
11.2m wide:	€23.52		
12m wide:	€25.20		

Measure over your hoop (B) and add 2m (1m per side for burying) or 1m (0.5m per side if using an aluminium rail), this gives you the width required.

If you pleat and fold the polythene at the gable as shown in photo to the right then measure the length of the tunnel (A) plus 2x C and add 1m for the length required.

If you have gable ends like the photo to the left (without pleats and folds) then take the length of the tunnel (A) and add 2m which gives you the length for the polythene to cover the main body of the Tunnel. For each gable end you need a sheet big enough to be at least 1m wider and higher than the Tunnel.

FABRICS

Black fleece mulch

1.5m x 100m (50g) black fleece mulch: €61

Ground Cover

Ground cover is a woven polypropylene fabric which suppresses weeds on the floor of the polytunnel. Once you cover an area with a polytunnel plant growth will rapidly increase including weeds. Ground cover gives you a way to manage the growth. When you initially erect the tunnel you could lay ground cover down over the whole floor area, and cut out sections to grow plants in as you need them.

1m x 50m (100 gram) ground cover: €41
 1m x 100m (100 gram) ground cover: €70
 1.5m x 100m (100 gram) ground cover: €106
 2m x 50m (100 gram) ground cover: €82
 2m x 100m (100 gram) ground cover: €140
 3.25m x 50m (100 gram) ground cover: €134
 Ground cover pegs (pack of 50): €10
 Double sided Ground Cover Tape 2.5cm x 15m: €20
 Ground Cover cut to length (per square metre): €1
 100m long rolls (per square metre): €0.70

RAISED BEDS

80cm x 130cm x 22.5cm high Raised Bed	€74
80cm x 250cm x 22.5cm high Raised Bed	€108
80cm x 370cm x 22.5cm high Raised Bed	€142
80cm x 490cm x 22.5cm high Raised Bed	€174
80cm x 130cm x 45cm high Raised Bed	€130
80cm x 250cm x 45cm high Raised Bed	€191
80cm x 370cm x 45cm high Raised Bed	€252
80cm x 490cm x 45cm high Raised Bed	€308
120cm x 130cm x 22.5cm high Raised Bed	€75
120cm x 250cm x 22.5cm high Raised Bed	€110
120cm x 370cm x 22.5cm high Raised Bed	€144
120cm x 490cm x 22.5cm high Raised Bed	€176
120cm x 130cm x 45cm high Raised Bed	€133
120cm x 250cm x 45cm high Raised Bed	€194
120cm x 370cm x 45cm high Raised Bed	€255
120cm x 490cm x 45cm high Raised Bed	€311
240cm x 250cm x 22.5cm high Raised Bed	€144
240cm x 370cm x 22.5cm high Raised Bed	€178
240cm x 490cm x 22.5cm high Raised Bed	€210
240cm x 250cm x 45cm high Raised Bed	€255
240cm x 370cm x 45cm high Raised Bed	€316
240cm x 490cm x 45cm high Raised Bed	€372

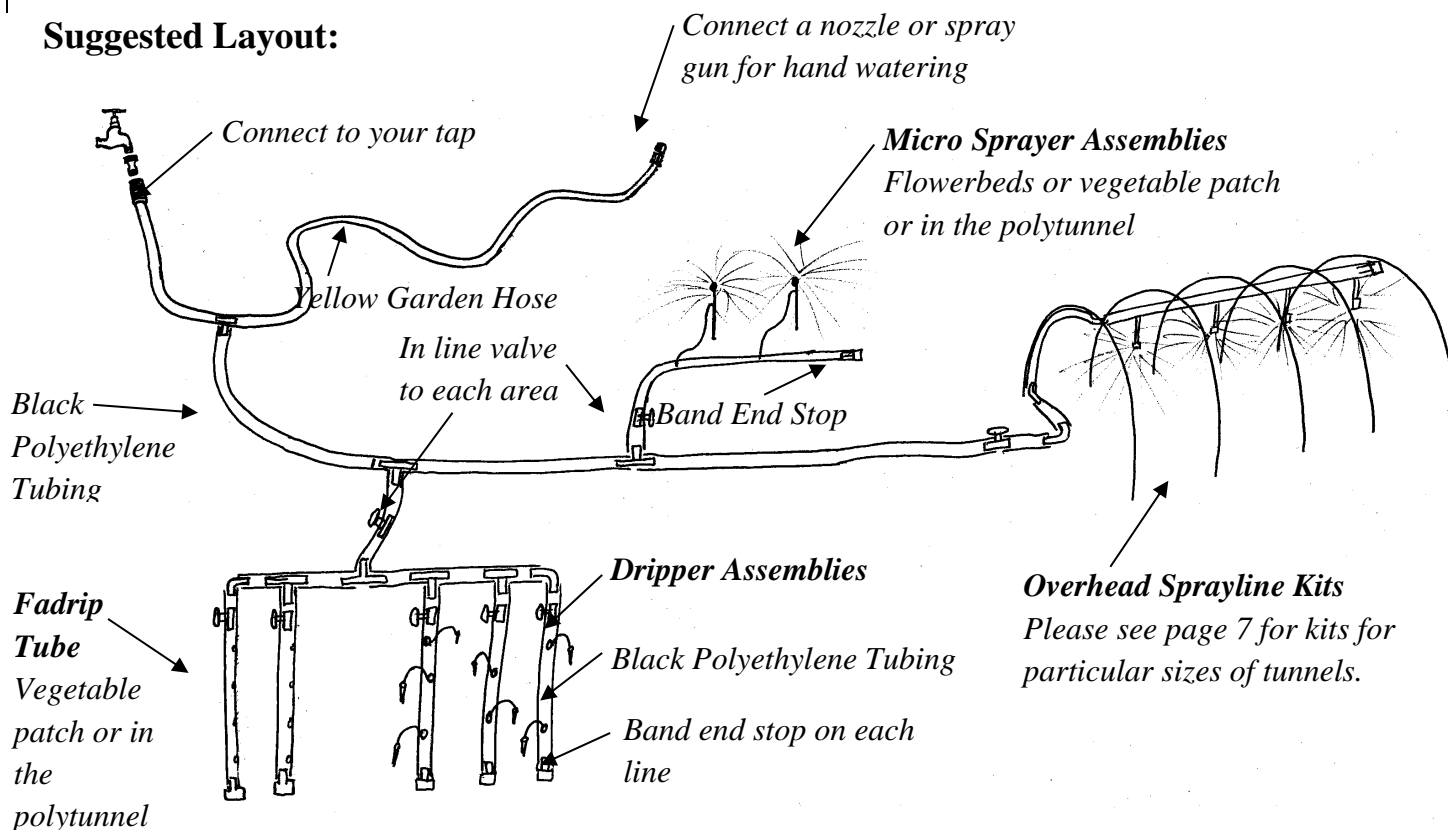

IRRIGATION EQUIPMENT

Setting up a watering system

The benefit of setting up a watering system (where at the turn of a tap the plants are watered) are obvious - you save a lot of time and with a little automation, you can have your plants watered automatically while you are away. Please note that 3 bar is the maximum pressure for most of the accessories below. We stock pressure reducers and filters if you require them. To set up your watering system you first need to have some or all of the components shown below.

Suggested Layout:

Automatic Watering Timer

Connect an automatic timer to the main tap to control the frequency and interval of watering.

Orbit Buddy II Tap Timer	€69
	<ul style="list-style-type: none"> Large LCD Screen Easy set logic programming 2 programs for timed watering from 2 outlets Watering duration from 1 to 240 mins Frequency 6 hrs, 12 hrs or 1 to 7 days Manual watering – interrupt cycle from 1 to 240 mins

Water Supply Kits

These are starter kits of tubing and fittings to deliver water to the different areas of your Garden and Polytunnel. You can then use a combination of micro sprayers, dripper assemblies & Fadrip tubing to irrigate your plants. Please note that Fadrip tubing is **not included** in the water supply kits.

Mini Water Supply Kit

€84

Contains:

- 25m roll of 16mm polyethylene tubing
- 5 band valves
- 5 band tees
- 2 band elbows
- 2 band straight joiners
- 5 band end stops
- 10 Goof Plugs (3mm)
- 1 Hobby punch (3mm)
- 20 Plastic Anchor Pegs
- 3/4" tap connector
- 12–15mm hose coupler

Maxi Water Supply Kit

€141

Contains:

- 50m roll of 16mm polyethylene tubing
- 10 band valves
- 10 band tees
- 4 band elbows
- 4 band straight joiners
- 10 band end stops
- 20 Goof Plugs (3mm)
- 1 Hobby punch (3mm)
- 40 Plastic Anchor Pegs
- 3/4" tap connector
- 12–15mm hose coupler

Micro Sprayers

These sprayers can connect directly into polyethylene tube (using a 3mm hobby punch), are mounted on 40cm stakes and can be placed in your tunnel or outdoors to spray water in a targeted area.

<i>Sprayer</i>	<i>Description</i>	<i>Output</i>	<i>Throw</i>	<i>Price</i>
Simijet 360° Garden Sprayer	Rotating sprayer with 3 different nozzles	60L/H (at 1.5 bar pressure)	2-5m	€5.00
Minijet 180° Sprayer	180° sprayer with adjustable valve	0-100L/H	0-2m	€4.00
Minijet 90° Sprayer	90° sprayer with adjustable valve	0-100L/H	0-2m	€4.00

Dripper Assemblies

Dripper assemblies are the most accurate way of watering and they work on low pressure. They allow you to deliver a precise amount of water to an exact point. They consist of a dripper, a 70cm long micro hose and a stake. They can be placed at the base of the desired plant and connected into polyethylene tubing via the micro hose (using the 3mm hobby punch). Ideal for potted plants.

2 Litre/Hour 'Niki' Dripper Assembly - (Grey) (Suitable for most pot plants)	€1.55
4 Litre/Hour 'Niki' Dripper Assembly - (Black) (For plants that may need extra water)	€1.55
16 Litre/Hour 'One Pot Sprayer' Assembly (For large planters with several plants)	€1.02
4mm Valve - To turn individual drippers on and off	€2.50

One Pot Sprayer

Fadrip Tubing

Fadrip tube is a hose with drippers built into it every 33cm. This is a cost effective way of delivering water to the base of your plants and it works on low pressure. You can connect Fadrip tubing to polyethylene tubing using the band fittings shown above.

Please see page 8 for prices of Fadrip kits that cover the complete floor area of particular sizes of tunnels.	50m roll	€37
	100m roll	€64

Hand Watering

Taps

<i>Description</i>	<i>Size</i>	<i>Price</i>
2-Way Tap (Plastic)	¾"	€13.50
2-Way Tap (Brass)	¾"	€45.00

Quick Connectors

Threaded Tap Connector (¾" Female)	€4.60
Hozelock/Gardena Hose Coupler (12 - 15mm)	€12.20

Spray Guns

Brass Watering Lance	€9.00
----------------------	-------

Aquamat Capillary Matting

0.7m wide Aquamat, cut to required length (per 10m length): €40
 1.0m wide Aquamat cut to required length (per 10m length): €60

All prices include VAT.

Delivery charge applies for accessory only orders. Please check with us at time of order for the cost.

Overhead Irrigation Spraylines

An Overhead Irrigation Sprayline is a simple watering system that is fitted to the ridge bar of the polytunnel. It sprays water over the whole floor area of the tunnel. The best time to water is apparently very early – like 6am, an automatic timer can be purchased so you don't have to get up too early.

You need to have 2 bar (28psi) pressure at the beginning of the sprayline and from 300 litres per hour (for a 6m long tunnel) to 1000 litres of water per hour (for a 20m long tunnel).

Having a watering system will save a lot of time spent at the end of a hose.

Overhead Irrigation Kits to fit your Polytunnel:

2.5m Wide Polytunnel									
Length:	4m	6m	8m	10m	12m	14m	16m	18m	20m
	€111	€137	€150	€163	€188	€211	€224	€250	€263

3.5m Wide Polytunnel									
Length:	4m	6m	8m	10m	12m	14m	16m	18m	20m
	€111	€137	€150	€163	€188	€211	€224	€250	€263

4.5m Wide Polytunnel									
Length:	4m	6m	8m	10m	12m	14m	16m	18m	20m
	€111	€137	€150	€163	€188	€211	€224	€250	€263

5.5m Wide Polytunnel								
Length:	6m	8m	10m	12m	14m	16m	18m	20m
	€156	€170	€183	€210	€224	€254	€281	€294

6m Wide Polytunnel

	€156	€170	€183	€210	€224	€254	€281	€294

Fadirp Ground Irrigation System

A Fadirp tube is like a hose which leaks out water in a controlled way along its length. It emits 2 litres per hour from built in drippers which are at 33cm (13 inch) spacings.

This system requires 1 bar (14psi) pressure and uses 6 litres per running metre of length. Usually the lines of Fadirp tube are spaced 60cm (2ft) apart (although the spread of water depends on the type of soil you have).

The advantage of drip irrigation is that it allows you to be more targeted about the amount of water plants receive, it does not put water on the foliage which can create problems and it uses less water and needs less pressure than the overhead system. Accessories are available for the Fadirp system such as automatic timers and also drippers for watering plants in pots.

Fadirp Ground Irrigation Kits to fit your Polytunnel:

2.5m Wide Polytunnel (4 lines of Fadirp)									
Length:	4m	6m	8m	10m	12m	14m	16m	18m	20m
	€117	€125	€125	€125	€132	-	-	-	-

3.5m Wide Polytunnel (6 lines of Fadirp)									
Length:	4m	6m	8m	10m	12m	14m	16m	18m	20m
	€130	€137	€144	€172	€179	-	-	-	-

4.5m Wide Polytunnel (7 lines of Fadirp)									
Length:	4m	6m	8m	10m	12m	14m	16m	18m	20m
	€143	€143	€178	€185	€192	€192	€237	€237	€244

5.5m Wide Polytunnel (9 lines of Fadirp)									
Length:	6m	8m	10m	12m	14m	16m	18m	20m	
	€191	€199	€206	€250	€257	€265	€292	€300	

6m Wide Polytunnel (10 lines of Fadirp)									
Length:	6m	8m	10m	12m	14m	16m	18m	20m	
	€197	€205	€212	€256	€263	€298	€306	€313	

Propagation Equipment

- Pictures and technical specifications of the products listed below can be found in the Bio Green brochure – please ask us for a copy.
- We normally carry in stock all of the products listed below but we can order in any other Bio Green product found in their brochure.

Reference		Price
ARZ-F	Arizona air circulation fan	184
